

This document contains all of the statutory requirements of the National Curriculum (2014). As a school we adapt the White Rose Maths scheme for our children. The document is to support the long, medium and short term planning processes to ensure both full coverage and progression. This document will form the start of the planning process and can be used as a monitoring tool to ensure all elements of the core areas are covered within the National Curriculum Year Group. This document should also be used in line with the small steps document, mental maths policy and calculation policy.

NB this long term plan is a guide to content, it may change dependent on the needs of the children. Assessment weeks, statutory assessment and consolidation weeks may be added in.

Year 6	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7	Week 8
Autumn 1	Growth Mindset	Place Value	Place Value	Calculations	Calculations	Calculations	Calculations	Calculations
